

Trakkabeam A800M

Long-range illumination

Available in black or white

High-Powered Searchlight

High-powered (800-watt) searchlight featuring a unique optical design which utilizes a Xenon lamp half the size of traditional searchlights. The Trakkabeam AM800 delivers a more intense and consistent beam where you need it.

Trakkabeam includes the industry's only in-transit, multi-filter solution. Up to six different filters can be activated at the touch of a button from the bridge.

DO-160E tested and certified for performance and reliability in a ruggedized marine-ready platform including lightning strike, vibration, AF and RF susceptibility, magnetic effect and more.

Applications:

- Navigation
- Coast Guard
- SAR support
- Harbour Patrol
- Airborne law enforcement
- Military applications
